

1. Fix style of all combo box of page as well as button -+ does not work fix it In the **Recommended accessories section**
2. In the Special Offer Product GET product when specialOffer field is true
3. In the Choose product quantity section we need to GET Product (sub document **typeQuantity**)
 - a. **Sort by sortFrontEnd (field).**
 - b. **GET /order/:slug(Using Promises, async / await).**
You can find this API in this path (**routes/api/ product.js**)
 - c. **For example:** <http://localhost:5000/order/dronexpronovads>.
4. In the Recommended accessories section we need to GET Product (sub document **accessories**)
5. When user in the choose product quantity select quantity in the section **Discount** must update data (5 Item Discount, you save ..., subtotal, total 2 item) also for accessories section.
6. First of all, load country data from DB in Country combo and load State in State Combo when page load select **country** with **IP address** of user and then **currency exchange rates** when user select **country** all price in page and currency must be change based on selected country from user.
 - a. **Like this page** (<https://hyperstech.com/intl/order.php?prod=dronexpro&lang=en>)
7. When user in the card number input number system automate select picture base on card number for example if user type number of VISA , it must to select visa card image and border of image must be purple. Also this process same for MasterCard.

In mind after fix all requirement app must to work in all browser (Edge, Chrome, Mozilla, Safari, Opera**).**
